**Re: NPDES Permit No. TN0081094**  
**Notice of Incomplete Application**  
**Clarksville Marina and Fairground Project**  
**Clarksville, Montgomery County, Tennessee**

Dear Mayor Piper:

The Division of Water Pollution Control (the division) has received your application for the above referenced project at the environmental field office as of December 29, 2009 and of supplemental application materials in our office on March 4, 2010. We have reviewed the application for completeness in accordance with TDEC rule 1200-4-5-.05 (2) and find the application to be incomplete. The processing of this application has been suspended until the following information has been submitted:

1. EPA Form 1:
  - a. Item VII – Provide the SIC code for construction activities. SIC code 1629, "Heavy Construction, NEC" has been used for other construction sites in Tennessee; however you must verify if this code is correct for your proposed construction project.
  - b. Item X – You must list the permit numbers for any additional permits that you have obtained for this project; this would include your ARAP permit and your CGP permit coverage.
  - c. Item XIII – You must submit the original signed copy of this form (photo copies will not be accepted).
2. EPA Form 2F:
  - a. Item IV – You must include in the acreage any offsite areas that drain through the site outfalls.
  - b. Item V – The entries listed in this part do not make any sense. You should either complete this section with appropriate information or mark it as "Not Applicable."
  - c. Item VII. Part A – Per the directions you are supposed to provide the results of at least one analysis for every pollutant listed in the table for each outfall. If it is not possible to collect a sample for analysis from each outfall, provide an explanation of why this is not possible and attempt to estimate approximate values for the pollutants listed for each outfall. If an estimate is to be given for the pollutants listed you should make note of that with an explanation of how the estimate was determined.
  - d. Item X – You must submit the original signed copy of this form (photo copies will not be accepted).
3. Storm Water Pollution Prevention Plan (SWPPP):
  - a. You must submit an original copy of the SWPPP signature page (photo copies will not be accepted).

- b. You must submit an original copy of the plans with the registered professional engineer's stamp (photo copies will not be accepted).
- c. Please provide information detailing who will install the sanitary sewer system (or lines) and when that installation will be completed. This must include information on how sanitary waste will be disposed of by the marina, including sanitary waste disposed by boats.

Please submit the above requested information in duplicate to the Nashville Environmental Field Office by April 14, 2010. You should be aware that in accordance with TDEC Rule 1200-4-5-.05 (2), your receipt of this notice does not preclude the division from later requesting additional material that subsequent to the notice of completeness is determined to be necessary for permit processing.

If you have questions, please contact the division at your local Environmental Field Office at 1-888-891-TDEC; or, at this office, please contact Ms. Erin O'Brien at (615) 253-2245 or by E-mail at *Erin.O'Brien@tn.gov*.

Sincerely,

Vojin Janjić  
Manager, Permit Section  
Division of Water Pollution Control
